

About NexGen Energy:

NexGen Energy Ltd. (“NexGen” or the “Company”) is a development-stage company with a portfolio of high-impact uranium projects in the Athabasca Basin, Saskatchewan which includes the 100%-owned Rook I Project (the “Project”), home of the Arrow Deposit. The Arrow Deposit is the largest to-be developed uranium project in Canada that is capable of becoming the world’s largest and lowest cost uranium mine. Developing the Arrow Deposit will deliver outstanding long-term economic and social benefits to the local communities, people of Saskatchewan and Canada while restoring Canada as a global leader in the delivery of clean energy fuel.

NexGen is focused on optimally delivering the Project and is committed to elite standards in aspects of the business including the environment, communities and economics. The Company is implementing the innovative design elements which will set the new global standard for environmental mine management and social well-being.

Currently, the Company is rapidly and sustainably developing the Rook I Project through the advancement of the Rook I Feasibility Study (“FS”), Environmental Assessment (“EA”), Initial Licence Application and through ongoing engagement with Indigenous communities.

NexGen is comprised of a dynamic workforce with an agile approach to a fluid business environment, where the Company values non-conventional thinking combined with entrepreneurial drive. The Company consists of experienced uranium industry professionals with expertise in exploration, corporate finance, permitting, mine development, and operation who are committed to optimizing the development of Arrow to create a generational organization.

The Company’s primary Operations Office is in Saskatoon, Canada with a corporate satellite office in Vancouver, Canada. The Company is listed on both the Toronto Stock Exchange and the New York Stock Exchange.

Role Overview:**Project Engineer:**

Reporting to the Chief Project Officer, the Project Engineer will provide support in all aspects of the engineering project. The incumbent will participate and contribute as part of a multi-disciplinary team, from start to finish, to deliver a project on time and on budget.

Position Responsibilities (including but not limited to):

- Collaborate and communicate effectively with all project participants to provide assistance and technical support;

- Participate in the budgetary process;
- Assist with cost analysis and risk assessments;
- Arrange meetings as required to coordinate requirements and progress between design, regulatory, consultants, construction and operations;
- Coordinate technical reviews of engineering deliverables by internal and external subject-matter experts;
- Develop reports, presentations, summaries, tables, graphs, and month end reports;
- Other duties as required.

Education & Experience:

- BS degree in Mining Engineering or relevant field;
- 3- 5 years experience in a project and/or operating mine environment; Underground mining experience would be an asset
- Excellent knowledge of design and visualisations software such as AutoCAD;
- Advanced MS Office skills;
- Experience with multidisciplinary engineering projects;
- Remote camp experience (FIFO) would be considered an asset;
- Proven commitment to workplace safety and demonstrate safety leadership.

Core Competencies:

Communication- Communicates with impact to inform, persuade, coach and inspire. Effectively builds rapport and appropriately delivers information in a timely, well organized, thoughtful and engaging manner so it is understood using speech or in writing. Communicates in an open, candid and consistent manner.

Team Effectiveness- Works collaboratively across-functional teams that embraces unique talents and diverse perspectives to achieve common goals. Actively participates as a prepared team member, demonstrating flexibility and respect for different workstyles. Pro-active approach to building relationships.

Work Management- Plans, manages, and follows through to ensure the flow and timely completion of activities that deliver successful work results. Maintains quality and safety standards to ensure work is completed according to standards. Demonstrates flexibility and adaptability.

Personal Accountability- Takes responsibility for own actions and outcomes. Maintains effective work behaviour in the face of setbacks or pressure; remains calm, stable, and in control of emotions; and, bounces back from disappointment. Willing to take the right stand, not necessarily the popular position.

Analytical/Critical Thinking- Identifies underlying issues in complex situations. Makes sense of ambiguous or confusing situations. Able to easily explain complex ideas. Provides clear and useful explanations.

Provides decision-makers with information required to make effective decisions in line with company objectives. Builds a logical approach to problem solving and anticipates possible consequences of decisions. Uses creative, conceptual and/or inductive reasoning

Functional & Technical Skills- Applies specialized knowledge in own area of expertise and openly shares information, knowledge and expertise with others.

Location

This position will be initially based in the Saskatoon office. Through the progression of the project, the position will travel regularly to site and will transition to a rotation schedule during construction through to operations.

How to Apply

To apply, please submit your cover letter and resume by email to hr@nxe-energy.ca. Please include **Project Engineer** in the subject line. While we thank all applicants for their interest in NexGen. NexGen is an equal opportunity employer.
